1. The amounts of psychotropic substances are defined following the existing practice of counteracting illegal drugs trafficking, as well as accommodating the actual international practice

based on the definitive daily dose (hereafter - DDD), according to the UN International Narcotic Control Board (INCB).

2. Small amounts refer to those not exceeding 10 DDD.

3. Big amounts refer to those within 100 to 1000 DDD.

4. Especially big amounts refer to those exceeding 1000 DDD.

5. The amounts of psychotropic substances produced in the form of extract, infusion, decoction, other liquids, are defined in terms of dry substances according to the existing criminal examination methods.

6. The table incorporates the psychotropic substances that remain in illegal trafficking in Ukraine.

7. In the case of detecting isomers and stereoisomers, compound and simple ethers, homologues and analogues, metabolites of psychotropic substances incorporated into Table 2, small, big, and especially big amounts are applied as for the relevant psychotropic substances included in Table 2.

* The mentioned psychotropic substances irrespective of their amounts are qualified as highly dangerous psychotropic substances, which trafficking is prohibited (Table I list № 2 in the [List of narcotic drugs, psychotropic substances, and precursors](#), approved by the Resolution of the Cabinet of Ministers of Ukraine No. 770 of 06.05.2000).

{Table 2 comes in the edition last updated by the Order of the Ministry of Health [No. 2806 of 04.12.2020](#)}
